

The I Am Poor Challenge

Using what you have learnt from the I Am Rich app, you'll be building a simple Flutter app from scratch.

If you head over to [this link](#), you can download the Widget tree structure.

Using the Widget tree structure, create an app called I Am Poor, using everything you have learnt so far.

Try to customise the app as much as you can to make it your own!

You can use your own images, or simply find one from the internet.

I hope you enjoyed the challenge and you're now familiar with the basics of building Flutter apps. I really encourage you to take the opportunity and fully customize the design of your app. Once you're done and proud of it, post an image or gif of it on Twitter with the hashtag #FlutterBrew so I can personally congratulate you on your work!

I'm looking forward to judging the best designs!

Your instructor, Angela
